Another aspect of the history of the toothbrush to be taken into account is toothpaste and other whiteners. These are usually used with the toothbrush in order to ensure that the teeth and breath were acceptable. The concept of toothpaste and mouthwash is quite old - almost as old as the Egyptians toothbrush. The tooth paste oldest known was created by the Egyptians. Is said to contain one drachma of rock salt, two drachmas of mint, one drachma of dried iris flowers and 20 grains of pepper. This was then crushed and mixed together to form a powder. When mixed with saliva and applied to the teeth, it would help whiten and clean your teeth. When experienced by an Australian dentist, the mixture worked far better than anything else created until the twenty-first century. Superhero sprints Review The only downside was that made your gums bleed. In the century, the next recorded version of toothpaste occurred. This mixture called dragon's blood, cinnamon and burn alum. This mixture tends to be more of an amusement for many scientists, Superhero sprints Download as there is no proof that there was "Dragon". What may really have been regarded as dragon's blood is unknown. The century saw a lot of innovations to toothpaste, although many Superhero sprints Pdf of them would be repulsive compared to what we are used to today. Coal, for example, was used to clean teeth.
